

TOOL SOLUTIONS BY ULTRA

ULTRA TECHNOLOGIES

Ultra Technologies is a authorized Channel Partners & Importer of Leading Industrial Product & Services of precision carbide cutting tools.

We established in India Maharashtra Pune in 2015.

From its inception, Ultra has focused on providing products and services that meet or exceed our customers' expectations. We provides the framework of our commitment to delivering the highest quality products.

QUALITY

We have adopted the following objectives:

- Establish an efficient workflow between operations and sales.
- Ensure that our products meet the highest quality values through **standardization of production processes and several quality control measures.**
- Increase our knowledge of the market through defined and regular processes
- Train and develop our employees.
- Improve our customer relationship management by a well-trained sales team.
- Commitment to continually improve and review our processes, policies, and systems to remain effective on our business and objectives

OUR PRODUCT

Ultra's original Clasic line of multi material cutting tools perform as good as or better than dedicated cutting tools from our competitors on most materials. Since 2015, we have complemented our offering by adding our Premium line, the highest performance cutting tools available. The Ultra product range provides innovative cutting tools that offer our customers the most efficient and flexible machining solutions. Our focus is to simplifying the process of choosing the right cutting tool for each application.

OUR BUSINESS PARTNER

Lamina Technologies is a Swiss manufacturer of carbide cutting tools established in Yverdon-les-Bains in 2002.

From our inception, we have been focused on understanding customers' needs and striving to exceed their expectations.

LAMINA are the global pioneers of the groundbreaking

Multi-Mat™ concept that, through innovative technologies, allows cutting tools to work on a multitude of materials.

Lamina continues its fast paced expansion with 7 subsidiaries and representation in over 50 countries. <https://www.lamina-tech.ch/>

Under the competence brand Tool Solutions by CERATIZIT we closely collaborate with private label distributors or tool manufacturers in order to develop and produce tailor-made cutting tools, which they then sell under their own label. From carbide blanks and semi-finished products to coated and ready-to-use packaged inserts or tool holders for milling, turning, drilling, parting and grooving – all our private label products meet individual customer requirements and offer top quality. www.ceratizit.com/en/products/metal-cutting/private-label/

The quality label for efficient hole production

High-precision drilling, reaming, countersinking and boring is a job for experts. That's why efficient tool solutions for bore machining as well as mechatronic tools feature the brand name KOMMET.

Product range:

- ▲ Indexable insert drills
- ▲ Reamers and countersinks
- ▲ Spindle tools
- ▲ Actuating tools
